

ACTISEED ZnMn

Agro nutrition

NutriCare
technologies

Product allowed for use in organic farming, in accordance with the EC regulation 834/2007

PROTEIN EXTRACT

ASSOCIATED WITH NUTRIENTS

Manganese (Mn): 30 g/L
Zinc (Zn): 50 g/L

PROTEIN EXTRACTS

Specifications

PACK SIZE
10 L

SHELF LIFE OF THE PRODUCT
18 months

FORM
Liquid (SC)

STORAGE CONDITIONS

Store away from frost and keep in original container out of direct sunlight and tightly closed.

FORMULATION
Protein Extracts

APPLICATION
Seed treatment

Agronomic interests

ROLE OF ACTIVE INGREDIENT

Our Protein extracts works like a cell activator works like. This cell activation induces genes in order to enhance the potential of plants by limiting environmental aggressions during their growth.

Sprayed protein extract

- > Stimulation of secondary metabolism
- > Expression of genomic system
- > Induced/repressed genes
- > The plant reinforces itself to preserve all of its potential for growth (quantitative and qualitative).

PRODUCT SPECIFICATIONS

ACTISEED ZnMn is a biostimulant associated with manganese and zinc to improve the growth of the seed.

ACTISEED ZnMn is used as a seed treatment.

This technique of seeds nutrition is an effective method for providing manganese and zinc.

Its allows a better nutrition and a better absorption of manganese and zinc in first satges od crops growth.

It secures sowing (early sowing: right dose, late sowing ; vigor, soil, and difficult climatic conditions).

FEATURES AND BENEFITS OF THE FORMULATION

Our Protein Extract range is formulated based on major nutrients to which crops are particularly sensitive in the event of deficiencies. The addition between protein extracts and selected nutrients ensure a balanced and complete nutrition for plants.

The mobilisation of the plant to induce gene and metabolism requires energy from the plant. Nutrients essential to the physiological functioning of the plant boosts its general health and ensure optimal growth

Directions of use

CROP RECOMMENDATIONS

SEED TREATMENTS

SUNFLOWER: 3-4 Liters per tonne

MAIZE: 6 Liters per tonne

FLAX: 6 Liters per tonne

CEREALS: 4-5 Liters per tonne

INSTRUCTIONS FOR USE

In the case of seed treatment in a mixture (fungicides + insecticides) incorporate the product last for better solubilisation.

In the case of seed treatment in layers so you have to put the product first (micro-nutrient are closer to the seed).

Precautions

COMPATIBILITY: Always read the product labels and follow the manufacturers' instructions for all products at all times. Some settings, outside the control of the manufacturer or distributor, may have repercussions on the performance of co-applied products. Therefore, the co-application is made at the risk of the end user. When combining with other components in a tank-mix, always add this product after powder. If there is any doubt at all, consult the manufacturer or distributor concerned.

IMPORTANT : Respect the uses, doses, conditions and instructions for use mentioned on the packaging, which are determined according to the characteristics of the product and the applications for which it is recommended. On this basis, conduct the crop and treatments according to the best agricultural practices taking into account, under your responsibility, all the specific factors concerning your farm, such as soil characteristics, weather conditions, cropping methods, cultivars and their specific resistances. AGRONUTRITION guarantees the quality its products only in their initial packaging over the period indicated on the manufacturer's certificates. They guarantee their conformity to the composition indicated on the packaging and to the regulations currently in force. Precautionary measure brochures are available on request. **To request a MSDS, thank you to contact : fds-msds@agro-nutrition.fr**
